2009 Work Items

Item A: Work with NAI Committee to provide measurable examples of NAI economic and environmental benefits

Item B: Work with ASFPM Executive Office to refine Coastal NAI training materials and to promote the course.

Item C: Work with the NOAA Coastal Services Center on RISKWISE initiative applying CNAI concepts

Task 5: Support ASFPM leadership and staff in the development of policies or activities related to climate change, including efforts to assist coastal communities to identify and adapt to the impacts of climate variability and change.
1.0 Overview

The mission of the Coastal Issues Policy Committee (Coastal Committee) is to develop and promote education, policies, and activities aimed at reducing the costs and impacts of coastal flooding, and protecting and preserving the natural and beneficial functions of coastal floodplains and associated coastal environments.

In fulfillment of this mission, the Coastal Committee seeks to foster communication and dialogue among coastal floodplain managers, coastal zone managers, government officials, interest groups, and other professionals responsible for managing our coastal resources or otherwise engaged in development activities occurring within and adjacent to our Nation’s coastal areas.

Historically, this committee has strongly influenced the coastal hazard identification and mitigation policies of FEMA’s Flood Hazard Mapping Program, including technical requirements for the agency’s Flood Map Modernization initiative. The committee has also made significant contributions to FEMA’s coastal erosion hazard studies and the agency’s efforts to engage state partners in erosion hazard mapping and management. In partnership with ASFPM staff and other ASFPM policy committees, the Coastal Committee has played a critical role in the development of the Coastal No Adverse Impact (CNAI) tools, including the CNAI handbook and training course.

The current Coastal Committee co-chairs are Pam Pogue of the URS Corporation and (someone to be announced). The committee Liaison is Mark Mauriello of the New Jersey Department of Environmental Protection.

Section 2 of this work plan presents the current objectives of the Coastal Committee and specific tasks required to achieve these objectives. This includes activities that are ongoing from year to year, as well as specific projects or initiatives for 2009. Many of these tasks described in Section 2 directly support ASFPM Goals and Objectives for 2009 that relate to coastal issues.
2.0 Task Outline

The Coastal Committee has developed the following objectives that relate to its current mission:

- Foster communication and dialogue and strengthen working relationships among the various professionals (e.g., floodplain managers, coastal zone managers, other government officials, interest groups) engaged in managing and/or protecting coastal floodplains and resources.
- Help provide coastal floodplain managers with access to information and resources that will enable them to enhance their knowledge, develop skills, and meet their professional responsibilities vis a vis floodplain management; and
- Identify and, where possible, aid in the resolution of technical and policy-related issues concerning coastal floodplain management.

Achieving these objectives requires a mix of ongoing tasks that are typically led or facilitated by the committee co-chairs, and other year-specific tasks that will require input from and engagement by the broader committee membership, other ASFPM policy committees, and/or ASFPM leadership.

The Coastal Committee has the following ongoing tasks:

1. General Coordination and Reporting
   - Participate in ASFPM Policy Committee conference calls and retreats.
   - At the ASFPM National Conference, attend the Policy Committee Chairs Meeting and hold an annual committee meeting
   - Prepare annual reports and committee work plans
   - In coordination with the ASFPM main office, develop and maintain mailing lists and other vehicles for communication with committee members

2. Intra-committee Communication and Coordination
   - Supplement the Coastal Committee meeting at the ASFPM National Conference with regular emails and/or website updates to communicate committee activities and opportunities for increased involvement by members or other volunteers
   - Monitor partner society reports and mailings (e.g., Coastal States Organization [CSO] Weekly Report) and other news media for events or activities relevant to the Coastal Committee mission, and disseminate as appropriate
   - Co-chairs continuously seek partnering opportunities and tasks relating to the committee’s mission that can be led or coordinated by Coastal Committee members, and link these opportunities with willing volunteers. This task is vital to expanding the reach, potential impact, and sustainability of the committee as a whole.

3. Policy Review and Development
   - Review and, as appropriate, respond via ASFPM to Federal agency policy actions (including rulemaking) and legislative activities relevant to the Coastal Committee mission.
Regularly solicit input from committee membership on emerging state and local regulatory or policy issues relevant to the Coastal Committee mission, and facilitate further engagement by ASFPM leadership and committees, as appropriate.

Provide assistance to ASFPM leadership in the development of policy papers, resolutions, formal correspondence, and testimony on policy issues that relate to the Coastal Committee’s mission and objectives.

The Coastal Committee has the following tasks for the 2008-2009 work year:

1. Promote timely completion of FEMA’s Map Modernization initiative, and transition to long-term management of flood risk data (ASFPM Goals 1.3.1, 1.3.2, 1.3.4, 1.3.5)
   a. Work, in collaboration with the Mapping and Engineering Policy Committee, with FEMA to transition Map Mod to long term map maintenance, with special consideration of maintenance needs in rapidly changing coastal environments.
   b. Promote, in collaboration with the Mapping and Engineering Policy Committee, mapping of coastal erosion risk zones and residual flood risk areas, including areas vulnerable to coastal inundation from storm surge and waves that exceeds current FEMA flood map data (1% and 0.2% events) or are vulnerable to relative sea-level rise.

2. Continue to participate in coalitions supporting key policies and programs (ASFPM Goal 2.2.4)
   a. Provide representative to the Coastal Hazard Caucus in order to collaborate with other organizations involved in key coastal policies and programs
   b. Represent ASFPM on various government agency work groups engaged in coastal activities (e.g., CSO annual meetings, Coastal Zone Management [CZM] Annual Program Managers meeting)
   c. Support ASFPM’s engagement in development of NOAA’s Digital Coast, including soliciting member review and input of interim products and web delivery mechanisms.
   d. Attend and deliver presentations on floodplain/coastal issues to key annual coastal conferences

3. Expand the application of the NAI principles to other community growth management approaches, along with enhanced NAI training (ASFPM Goal 2.3)
   a. Work with NAI Committee to provide measurable examples of NAI economic benefits
   b. Work with ASFPM main office to refine Coastal NAI training materials and to promote the course.
   c. (hardened structures along the coastline) such as groins, jetties and seawalls

4. Support ASFPM leadership and staff in the development of policies or activities related to climate change, including efforts to assist coastal communities to identify and adapt to the impacts of climate variability and change.
On the following pages is a detailed list of Task Summary sheets describing the level of effort needed to complete this Coastal Committee work plan items.

**Detailed Task Description:**
Provide updates on the call of “hot issues,” progress of projects underway, solicit membership involvement in the development of white papers and upcoming legislative testimony as relevant, and need for integration with other committees on various issues (e.g. climate change, mapping coastal risk).

**Prerequisites Needed:** (Activities That Need To Be Performed Before This Task Can Begin)
- Conference call agenda

**Completion Schedule:**
- 6-12 calls annually
- Committee retreat annually

**Deliverables:**
- Summary of Policy Committee Calls highlighting points relating to Coastal Committee.
  Sent via e-mail to those Coastal Committee members that are interested in receiving committee call summaries.

**Other Necessary Support or Resources:**
Input from Liaison and Co-Chairs from other policy committees on issues from the call that merit involvement with other committees

**Approximate Direct Cost to Complete: (Labor and Non-Labor)**
- Labor – None – donated time
- Expenses – travel to and from retreat

**Approval Process: (Does The Task Require Board Approval?)**
None needed

**Detailed Task Description:**
Objective is to recruit new members to Coastal committee and “revitalize” existing membership. To accomplish this:

- Send initial email to all coastal policy members giving them meeting date, time and location (April 2009)
- Co-chairs develop agenda, enlist other committees if necessary and coordinate meeting times if possible (April/May 2009)
- Prepare handouts and work products such as workplan and annual report (May 2009)
- Send 2nd email with agenda attached (May 2009)
- Send third email with agenda and handouts attached (end of May/first of June 2009)

**Prerequisites Needed:**

- Accurate membership listing of Coastal Policy Committee (next task)
- Finalized annual report/work plan
- Finalized agenda

**Completion Schedule:**

- See above task description

**Deliverables:**

- Annual Coastal Policy Committee meeting agenda and handouts

**Other Necessary Support or Resources:**

- Coordination with other committees as needed
- Location and other logistical details relating to meeting

**Approximate Direct Cost to Complete:** (Labor and Non-Labor)

Detailed Task Description:
Objective is to maintain accurate listing of existing members and to recruit new members to Coastal committee.
• Work with Executive office to review existing list
• Recruiting new membership - Send out notice to all coastal state chapters – membership recruitment form to be handed out at state chapter meetings
• Assign tasks and deadlines to specific members at annual meeting

Prerequisites Needed: (Activities That Need To Be Performed Before This Task Can Begin)
• Accurate membership listing of Coastal Policy Committee from ASFPM EO
• Membership form to be handed out to Coastal State Chapters

Completion Schedule:
• Get membership listing from ASFPM EO – February 2009
• Develop and then finalize “form” to be disseminated at coastal State Chapter meetings

Deliverables:
• “Living” coastal Policy Committee membership list

Other Necessary Support or Resources:
• Coordination with ASFPM Executive Office

**Detailed Task Description:**
Climate change is a critical issue impacting this nation as well as our states and communities. Many reports have been written and ASFPM has been involved in providing comment. However what is needed is to determine how the ASFPM Coastal Committee will address these various issues, initiatives and projects. Ideally a “champion” needs to step forward in order to provide leadership to the Committee on how we should engage on these issues.

**Prerequisites Needed:** (Activities That Need To Be Performed Before This Task Can Begin)
- Someone with expertise in this area to lead this effort.
- A summarization on ASFPM efforts so far.

**Completion Schedule:**
To be defined

**Deliverables:**
To be defined

**Other Necessary Support or Resources:**
- Coordination with other Policy Committees on past and on-going efforts

**Approximate Direct Cost to Complete:** (Labor and Non-Labor)

**Detailed Task Description:**
One initiative that has been on-going for the past 4 years is RISKWISE championed by the NOAA Coastal Services Center. RISKWISE is an effort to work with local communities to help them to better identify risks within their locale, how these risks are associated with long-term planning and land use decisions, as well as what tools, products and various means of outreach are needed to communicate risk to a variety of local leaders that are directly involved in the growth and sustainability of their community. Partners actively engaged in this effort with the NOAA, CSC include the National Weather Service, Sea Grant, the National Association of Counties. Many of the concepts used by RISKWISE are derived from ASFPM’s CNAI.

**Prerequisites Needed: (Activities That Need To Be Performed Before This Task Can Begin)**
- Re-connect with Sandy Eslinger, NOAA, CSC (RISKWISE lead)
