OUTSMARTING THE STORM: THE SCIENCE OF FLOODPLAIN MAPPING

**Tuesday, 22 October 2013
2:30-3:30 PM
Senate Dirksen 366**

How do we predict where flooding is likely to occur? This briefing will discuss the technology and modeling techniques that scientists and engineers use to assess the risk of flooding and to develop flood hazard maps. Learn how this information is used by floodplain managers who deal with flooding hazards. Four experts will explain the information and concepts that underpin the nation's flood hazard and flood risk maps.

OPENING REMARKS BY: SENATOR MARY LANDRIEU

SPEAKERS:

Gerry Galloway, University of Maryland

David Maune, Dewberry

Michael Buckley, Association of State Floodplain Managers

John Dorman, North Carolina Department of Public Safety

Please RSVP to Abby Seadler (aseadler@agiweb.org) by 18 October 2013
